### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kinderman et al. (US Patent No 4789571) in view of DiMuzio (US Patent No 6237882).

Kinderman discloses cutting pieces of foil of different geometric shapes (column 2, lines 10-24); coiling the strips by threads (20, 22, 24, 26) to form a fluffy garland (Figure 1).

Kinderman does not explicitly disclose fixing pins on a hemispheric base and winding the garland around said base.

DiMuzio discloses fixing pins (20) on a hemispheric base (Figure 1A) and winding a garland about said base and fixing said garland by said pins to form a three-dimensional hemispheric ball (column 4, lines 11+). The use of such pins is advantageous in that it allows for a more secure retention of the decorative element (column 4, line 9). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to form a garland from strips of differing geometries as disclosed by Kinderman, and wrapping said garland about a hemispheric base using pins to secure said garland, as taught by DiMuzio, in order to form a more secure union.

Art Unit: 3726

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
